

THE NATIONAL DATA CENTER

Kampala and Jinja Campus

Brief History

- In FY 2012/13 Cabinet Approved the Strategy for Rationalization of Information Technology Services across all Government entities.
- Eliminating duplication in IT projects and wastage of resources.
- The strategy provided for establishment of a National Data Centre with Disaster Recovery Services for all Government Applications and Data.
- Starting with three (3) Government Applications, today the National Data Centre hosts over 306 Critical E-Government Applications.

Services

Infrastructure as a Service

Foundational building blocks like servers, storage, and networking.

Software as a Service

Access ready-to-use applications like email without the need for on-premises.

Platform as a Service

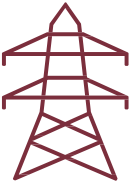

Environments for building and deploying applications, handling tasks like database management and operating system updates.

Backup as a Service

Automated data backup and recovery, ensuring the protection of your critical information.

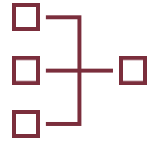

Infrastructure

Redundant Power

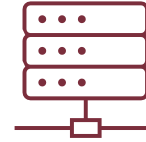

Cooling

Connectivity

Security

Colocation Space

400 m²

Total Campus Sizes

0.4 MW

Total IT Load

500 KVA

Power Grid

60

Racks

Site specifications

- **Gensets** : DCC Certified Diesel Generators
- **UPS** : 150 Dual KVA modular UPSes
- **1200MM fire rated security doors**, Smoke, Dust & Fire Detection and retardant systems.
- **Access Control** : 24/7 IP Motion Sensor enabled CCTV, IRIS & Biometric Access Control, DCIM.
- **Cooling** : Precision Air Conditioning (PAC)
- **Connectivity** : All Network Provider connections
- **N+1 Fault tolerant** providing at least 72-hour power outage protection

Data Center Racking

- 300 E-Services currently hosted
- SLA : 99.98%

Security and Build Certifications

Certification Received

On Track for Q2 2026

On track for Q3 2026

Connectivity at the Data Center

Internet Service Providers

- MTN
- Airtel
- Blue Crane Communications
- Liquid Telecom
- Uganda Telecommunications Corporation Ltd

Upstream Providers : SEACOM

Latency from Kampala to key cities in East Africa

Expansion plans

60 Racks - 300 Racks

2 Data Centers – 4 Data Centers

IT load 0.5 MW – 3 MW

IT space 400 m² – 1800 m²

500m² co-work space

PCI-DSS Certification
